

### **Honors Program Committee Action Items**

Two items of business were considered electronically.

The committee considered a proposal for an Honors-designated course.

- BIOL 428 – Conservation Biology (Alan Griffith)

The committee voted on March 26, 2020, to approve the proposal for the course, starting in the spring 2021 term.

The committee considered a motion to allow Honors-designated courses to be completed with a grade of Credit, Pass, or A-D letter grade. This change applies to the spring 2020 term only. No Credit or F grade in an Honors-designated course will not fulfill Honors Program requirements. An overall 3.2 UMW GPA would still be required to graduate with University Honors, factored by courses receiving letter grades. Any Honors students who fail to achieve the minimum progress requirements during the spring 2020 term would be considered on a case-by-case basis by the Honors Program staff and committee in order to determine their Honors Program status. The committee voted on March 26, 2020, to approve the motion.
