

University General Education Committee
Electronic Committee Actions since
March 9, 2020

1. The committee voted unanimously to approve an exception to the “old” gen ed requirements that would allow the sequence of EESC 111-EESC 121 to satisfy the Natural Science sequence requirement. The old sequence that this would replace is EESC 111-EESC 210. EESC 210 is no longer offered, and the new course, EESC 121, covers the content of 210 and the associated lab course EESC 211.

2. Requests for re-evaluation of transfer credits for general education designation
 - a. Student 1 for Global Inquiry – not approved
 - b. Student 2 for Global Inquiry – not approved
Both students were requesting GI designation for the equivalent of our HIST 121, which is not designated for the Global Inquiry requirement.
 - c. Student 3 for Global Inquiry – not approved – the committee did not feel that the course had the requisite emphasis on global aspects
 - d. Student 4 for Human Experience and Society – not approved – the committee did not feel that the course satisfied the learning objectives for an HES designation
 - e. Jerome Giuliano – approved for ALPP
